Financial Summary

Since the earthquake, a recovery led by N.A. and Japan along with new model offerings led to an increase in auto sales; India led an increase in motorcycle sales.

Operating Income rose 92.1% to 100.8 billion compared to the same period last year.

Financial Highlights

Honda Group Unit Sales

Motorcycle:

Increased in Asia

Automobiles:

Increased in all regions

Power Products:

Increased in Asia and "Other regions"

Net Sales and Operating Revenue

-Recovery from the earthquake and new model introductions led to an increase for automobile business operations

-Currency fluctuations had a negative impact

Operating Income

【Positive Factors】

- Positive change in sales volume and model mix
- Cost reduction efforts

【Negative Factors】

- Increased SG&A expenses
- Increase in R&D expenses
- Currency fluctuation impact

Caution with Respect to Forward-Looking Statements:

This slide contains forward-looking statements about the performance of Honda, which are based on management's assumptions and beliefs taking into account information currently available to it. Therefore, please be advised that Honda's actual results could differ materially from those described in these forward-looking statements as a result of numerous factors, including general economic conditions in Honda's principal markets and foreign exchange rates between the Japanese yen and the U.S. dollar, the Euro and other major currencies, as well as other factors detailed from time to time.

Accounting standards:

Our consolidated financial standards are prepared in conformity with U.S. generally accepted accounting principles.

Notice on the Factors for Increases and Decreases in Income:

With respect to the discussion above of the change in operating income, management has identified the factors set forth below and used what it believes to be a reasonable method to analyze the respective changes in such factors. Each of these factors is explained below. Management has analyzed changes in these factors at the levels of the Company and its material consolidated subsidiaries.

(1) "Foreign currency effects" consist of translation adjustments, which come from the translation of the currency of foreign subsidiaries' financial statements into Japanese Yen, and foreign currency adjustments, which result from foreign-currency-denominated sales, which, at the levels of the Company and those consolidated subsidiaries which have been analyzed, primarily relate to the following currencies: U.S. dollar, Canada dollar, Euro, GBP, BRL and Japanese Yen.

(2) With respect to "cost reduction", management has analyzed cost reduction and effects of raw material cost fluctuations at the levels of the Company and its material foreign manufacturing subsidiaries in North America, Europe and other regions.

(3) With respect to "changes in net sales and model mix", management has analyzed changes in sales volume and in the mix of product models sold in major markets which have resulted in increases/decreases in profit, as well as certain other reasons for increases/decreases in net sales and cost of sales.

(4) With respect to "selling, general and administrative expenses", management has analyzed reasons for an increase/decrease in selling, general and administrative expenses from the previous fiscal year net of currency translation effects.

-Currency Effects-
(effects associated with sales transactions and translation effects)
